**Phone number:**  
312-626-6799

**Webinar ID:**  
899 2623 2996

### Tonight's Meeting

The purpose of this meeting is to discuss the upcoming improvements to Quivira Road from 143rd Street to 151st Street and to discuss the land acquisition process. Property owners affected by right-of-way and easement acquisition will have the opportunity to have questions answered about the acquisition process and view project exhibits.

### Project Background

Roadway improvements to Quivira Road will consist of reconstructing the existing 2-lane section to a 2-lane divided arterial roadway which will include a median, curb and gutter, turn lanes, bike lanes, 5' wide sidewalk on the west side, 10' wide sidewalk on the east side, enclosed storm sewer system, and street lighting located in the median.

Access management guidelines, design standards, and resident input were reviewed and considered when determining median break locations to provide full access at adjacent roadways and intersection design. Roadway speed will be posted as 40 MPH.

### Project Status

The City of Olathe and design consultant, HNTB, have completed preliminary project design and are beginning the land acquisition and final design stage of the project. As part of this project, additional right-of-way and easements are needed from adjacent properties. The City of Olathe will hire a land acquisition specialist, who, along with City staff, will work with property owners on an individual basis for any needed acquisitions. Once land acquisition is complete, utility companies will begin to relocate in the area and project construction

Project status updates and plan exhibits can be found at [OlatheKS.gov/Quivira](http://OlatheKS.gov/Quivira).

### Quivira Road (143rd Street to 151st Street) Tentative Project Schedule
