GENERAL INSTRUCTIONS

- To assist fire departments using reporting systems in a state system as part of NFIRS, data classifications are identified for the various questions throughout the form.
For this study, fire experience for calendar year is requested. Does the data reported on this form cover the time period January 1 to December 31 of the year? [X] Yes [ ] No
If No above, and your department summarizes its data on a fiscal rather than a calendar year basis, report your fire experience for the most recently completed fiscal year and indicate the time period covered: From 2013 To 2014
Report fire experience only for areas where you had primary responsibility. Do not include areas where you had mutual aid or assistance responsibilities.
Please make your answers as legible as possible; data will be keyed for processing directly from this form.
If the answer to a given question is zero; write 0.
If you do not keep the records necessary to answer a question, write NA (not available). It is extremely important that answers of NA can be distinguished from zero. For example, if your department had no civilian fire deaths, report 0, do not report NA. No question should be left blank.

## DEFINITIONS

**Civilian Casualties:** The term “civilian” should include anyone other than a fire fighter and covers public service personnel, such as police officers, civil defense staff, non-fire service medical personnel, and utility company employees.

**Injury:** Physical damage suffered by a person as a direct result of fire and that requires (or should require) treatment by a practitioner of medicine (physician, nurse, paramedic, EMT) within one year of the incident (regardless of whether treatment was actually received), or results in at least one day of restricted activity immediately following the incident.

**Death:** An injury that occurred as a direct result of a fire and that is fatal or becomes fatal within one year.

**Incident:** The movement of a piece of fire service apparatus or equipment in response to an alarm.

**Fires:** Any instance of uncontrolled burning. Include combustion explosions and fires out on arrival. Exclude controlled burning (whether authorized or not), overpressure rupture without combustion, mutual aid responses, smoke scares, and hazardous condition responses (e.g., oil spill without fire).

**Mutual Aid or Assistance:** Any assistance rendered to another fire department in an area that is not your primary responsibility.

**Structure:** An assembly of materials forming a construction for occupancy or use in such a manner as to serve a specific purpose. A building is a form of a structure. Open platforms, bridges, roof assemblies over open storage or process areas, tents, air-supported structures, and grandstands are other forms of a structure.

**Fires in Highway Vehicles and Other Vehicles:** Fires in these instances may have been associated with an accident; *however, casualties and property loss reported should be the direct result of the fire only.* Highway vehicles include any vehicle designed to normally operate on highways, e.g., automobiles, motorcycles, buses, trucks, trailers (not mobile homes on foundations), etc. Other vehicles include trains, boats and ships, aircraft, farm, and construction vehicles.

**Property Damage and Contents:** Give your best estimate for overall direct loss—loss to contents, structure, machinery, a vehicle, vegetation or anything else involved in the fire. Do not include indirect losses, such as business interruption, or temporary shelter provisions.

### DATA INCIDENT SYSTEM

If your department is part of a state system that participates in NFIRS (National Fire Incident Reporting System), please select the version of NFIRS that the data reported on this form is based on (check one):

### PART I: POPULATION AND AREA PROTECTED OF PRIMARY RESPONSIBILITY AND COMMUNITY TYPE PROTECTED

Report the number of people (permanent residents) and the area you had primary responsibility to protect. Do not count populations or areas to which you responded under mutual aid or assistance agreements. Include populations of neighboring areas only if you had primary responsibility for their fire protection. Do not include seasonal populations (e.g., vacationers), or daytime working populations.

**Number of people (permanent residents) your department had *primary responsibility* to protect (exclude mutual aid areas):** <sup>132,437</sup> \_\_\_\_\_

**Area protected in square miles your department had *primary responsibility* to protect (exclude mutual aid areas):** <sup>61.1</sup> \_\_\_\_\_
