# Rapid Damage Assessment Job Aid

This Guide was developed for use by the City of Olathe, Kansas Fire Department. It is intended to provide rapid damage assessment team members a tool to assess conditions quickly within the city following a significant event.

**Purpose:** To conduct a quick, systematic assessment to provide accurate information to decision-makers so that they may make informed decisions regarding resource allocation and initiate mutual aid requests as needed.

Several assumptions have guided the development of the Rapid Damage Assessment Plan and Guide.

- Assessments will be conducted from the street inside a vehicle. Interior inspection is not a component of this process.
- Follow-up inspections may follow at a later time if appropriate and necessary.
- Assessment team members may not have training in other emergency response activities.
- The assessment focuses primarily on businesses and large facilities in Olathe. Single-family dwellings (and most multi-family units) are outside of the scope of this assessment.
- Team members will have the opportunity to observe critical infrastructure, bridges, roads, etc. while on their route. Team members are encouraged to report pertinent damage information on these as well.

## Step 1 – Preparation:

- Before beginning the assessment, team members should ensure they have the necessary supplies and equipment to complete this task. Team members should have:
  - the Guide
  - writing instruments
  - communication method (radio and cell phone)
  - safety equipment if appropriate
  - identification, and
  - access to an authorized vehicle.
- Team members will receive a briefing and direction from the Rapid Damage Assessment Unit Leader before they begin. Each team will consist of 3-4 people and will receive an assignment for 1 of 7 assessment areas. (Note: the assessment areas correspond to fire stations. All routes begin at the designated station. Not all routes may be active depending on the scope and scale of the disaster.)
- Teams will be named with a standard convention. First number will indicate the station and “A” or “B” will correspond with Route 1 or 2. For example, RA Team 6A is the rapid assessment team from Station 6 completing the first route.
- Perform a communications check prior to beginning route to ensure communication link with dispatch and the Fire Department Operation Center (DOC).

# Rapid Damage Assessment Job Aid

## Step 2 – Conduct Rapid Damage Assessment:

- Follow the directions listed with each map to complete the designated routes. There are two routes for each station. Two teams may be assigned to the routes separately or one team may complete both.
- The team's priority is to complete the assessment safely. Please drive carefully through designated areas. If teams see situations requiring emergency assistance, dispatch should be notified. There may be times when teams are compelled to stop and render aid. This should be minimized as it is critical to get your report back to the Fire DOC as soon as possible. If assistance is needed, radio dispatch to report.
- There may be some instances where teams are required to alter their route. If access is limited due to debris, downed power lines, etc., teams can re-route as practical in order to drive past all facilities listed on form. If no safe route can be determined, note that on the reporting form and proceed to next building on list.
- While the assessment focuses on buildings, if there are other notable observations (impassable roads, damage to highways or other infrastructure, etc.) these should be noted on the reporting form.
- Some team members may wish to take photos of damage. No cameras will be issued for team members; however,

personal equipment may be used at the team member's discretion.

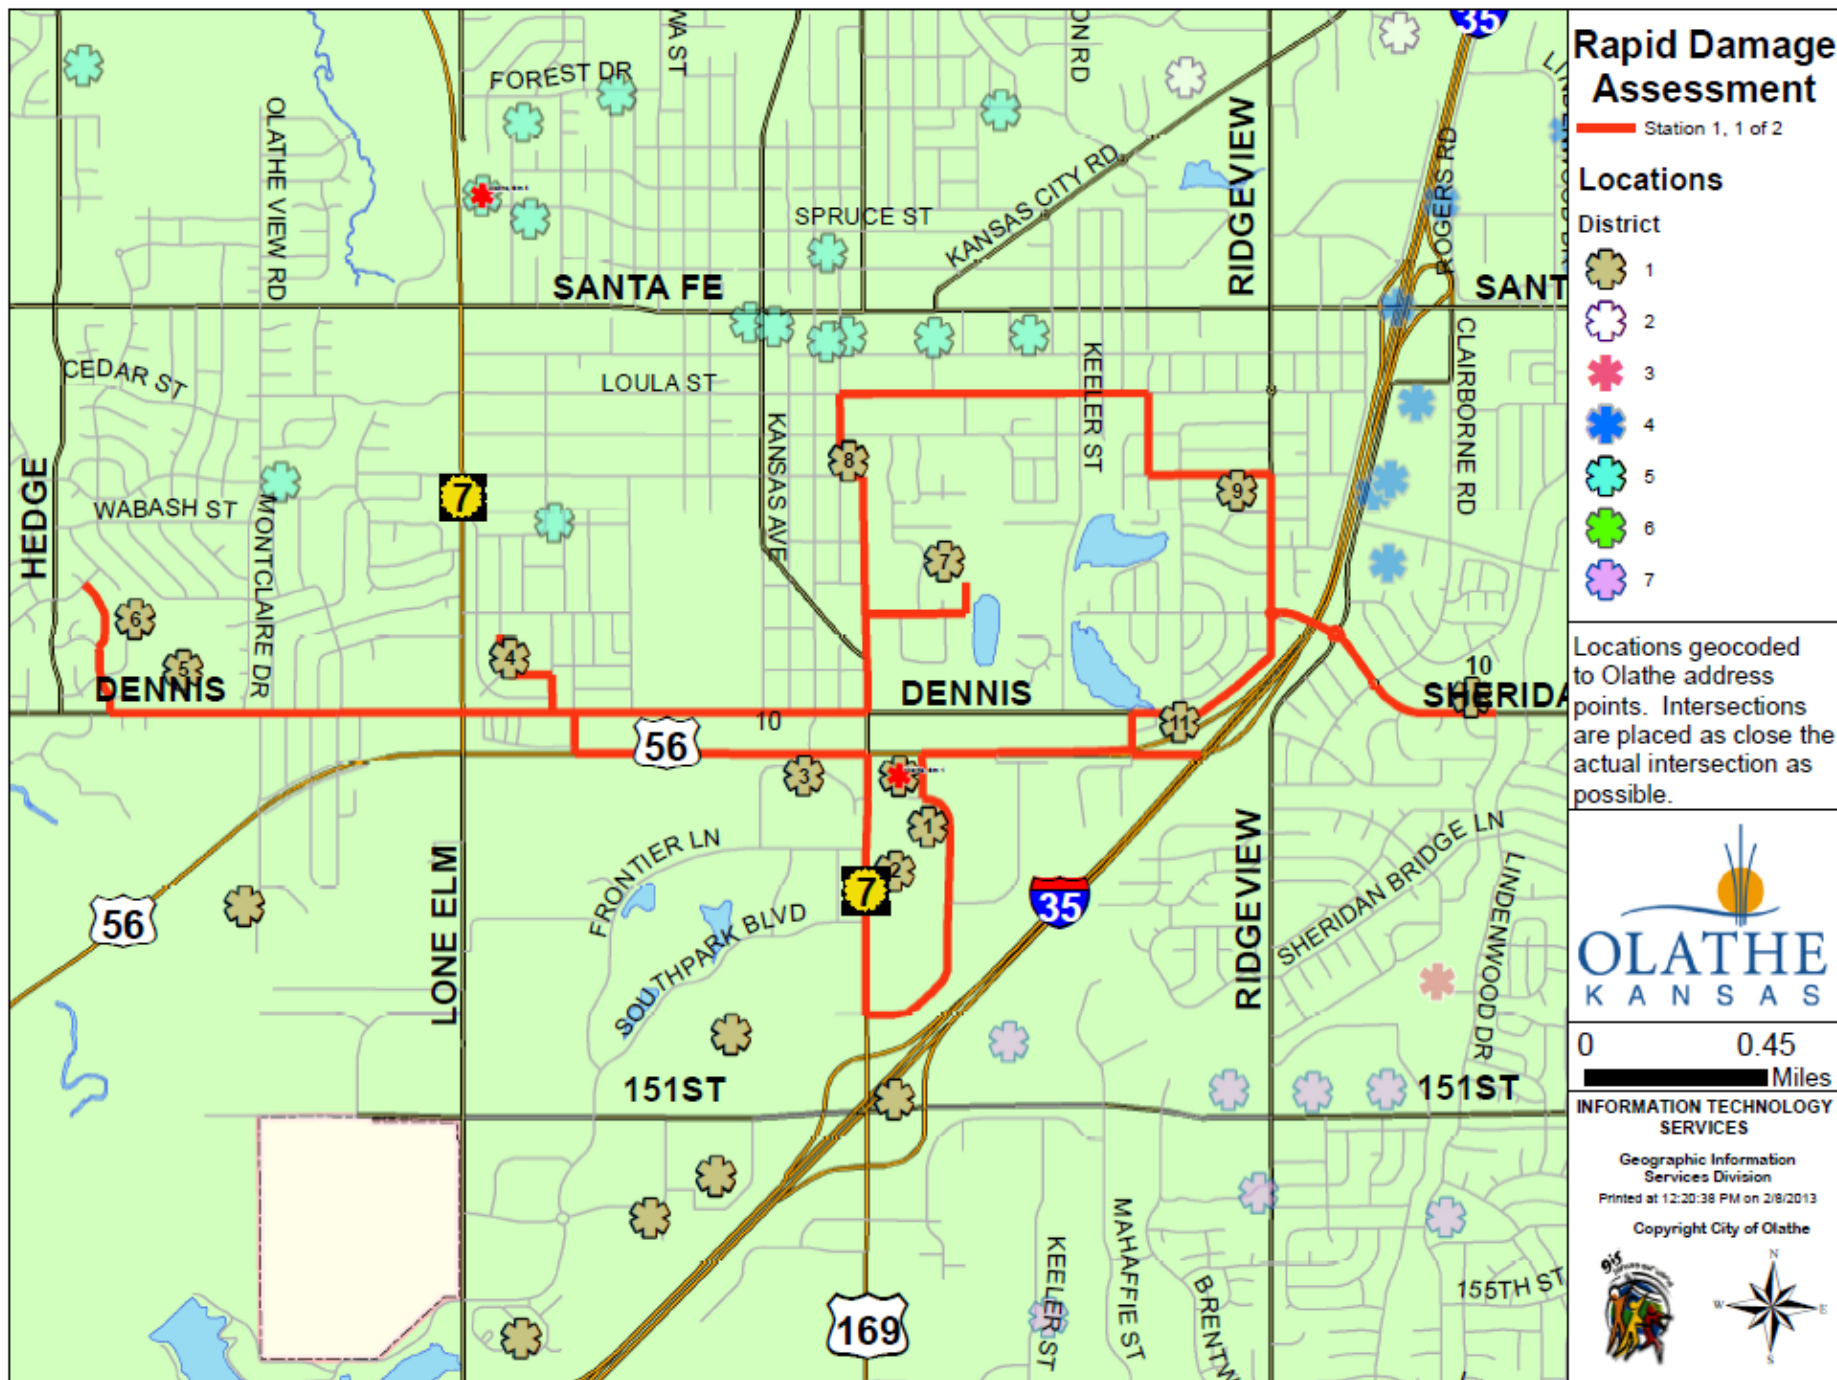

## Step 3 – Reporting:

- Complete the Reporting Form for as fully as possible. Make relevant notes. Write legibly. Once the team has returned to the fire station, submit the form to the DOC by scanning the form and emailing the electronic copy to [damageassessments@olatheks.org](mailto:damageassessments@olatheks.org). If the power is out, communicate key assessment findings via radio to the DOC.
- If team members took photos, they can be saved on the shared network drive in the following folder: P:\Olathe Fire Department\COMMON\Damage Assessment.
- After completing assessment, report availability through the appropriate command structure.

**Call
